PROFESSIONAL SUMMARY

Computer Science Engineering student with a strong foundation in Java, Python, SQL, data structures, and web technologies. Skilled in developing scalable applications using object-oriented principles, with strong problem solving abilities. Seeking an internship or entry-level role to apply technical skills and contribute to impactful solutions.

EDUCATION

B-Tech Computer Science and Engineering (CSE), Avanthi Institute Of Engineering And Technology	2027
• CGPA: 8.9 / 10	
Intermediate (MPC), Narayana Junior College	2023
• CGPA: 9.4 / 10	
Secondary School Certificate (SSC), Narayana High School	2021
• CGPA: 10 / 10	

TECHNICAL SKILLS

Programming • Java • Python	Frontend • HTML • CSS
Database SQL (Oracle)	Tools • VS Code • Oracle

PROJECTS

- College Enquiry AI Chatbot**
 - Designed and developed an **AI**-based chatbot to handle student queries efficiently
 - Enhanced information accessibility by providing instant, automated responses
- Student Productivity Dashboard**
 - Developed a multi-module web application using **HTML**, **CSS**, and **JavaScript**
 - Implemented features to track tasks and improve student productivity
 - Deployed the application on Netlify

STRENGTHS

Problem-solving Strong problem-solving mindset with analytical thinking	Learning Rapid learner who adapts quickly to new technologies
Teamwork Executes effectively both independently and in teams	Passion Passionate about building real-world software solutions

CERTIFICATION

- Devops using aws**
 - Completed a 4-weeks workshop on Devops practices using AWS
 - Explored tools used in modern Devops workflows
 - Understood cloud infrastructure and automation concepts
- Java full stack**
 - Built mini-projects to apply full stack development concepts
 - Understood database connectivity and application deployment basics
- Cyber security and data security**
 - Learned threat detection, encryption, and secure data handling
 - Gained hands-on exposure to basic ethical hacking and network security
